

Rafael Dutra

Brazilian, single.

[Porto Alegre/RS](#)

Email: raffaeldutra@gmail.com

Personal Statement

More than 13 years of experience in Information Technology, Network Administration, Infrastructure analysis, working especially with [GNU/Linux](#).

More than 3 years working with [PHP](#) development and frameworks ([Laravel](#) and [Codeigniter](#)), [Vagrant](#), [Bower](#), [Composer](#) and [Git](#).

In the last 2 years, I've been working mainly on Infrastructure automation ([Infra as Code](#)) and containerization with [Docker](#).

Work Experience

[Stefanini | IT Solutions and IT Staffing](#) (<https://stefanini.com>)

Technology company - Porto Alegre/RS

Aug/2018 - Present

The main goal is bring new customers using automation (Continuous Integration and Continuous Deployment/Delivery) and Cloud Computing.

- Deployment and infrastructure automation using ([Docker](#), [Docker Compose](#), [Bash](#), [Terraform](#) and [Puppet](#)).
- [AWS](#) ([Elastic Cloud Computing \(EC2\)](#), [Elastic Block Storage \(EBS\)](#), [Relational Database Service \(RDS\)](#)).
- Document internal tools used at [AWS](#).
- [Continuous Integration](#) ([Git](#), [Gitlab](#))
- [Created modules for Terraform to manage records at AWS Route 53 \(DNS\)](#)
- [Created modules for Terraform to manage zones at AWS Route 53 \(DNS\)](#)

[Jive Software](#) (<https://jivesoftware.com>)

Jive Software is now a part of [Aurea Company](#) (<https://aurea.com>)

Technology company - Portland - Oregon - United States.

Jan/2018 - Jul/2018

Working remotely as independent contractor for [Crossover](#).

My main goal was to reduce cost at [AWS](#) and learn internal tools used in the company to provide support.

- Deployment and infrastructure automation ([Docker](#), [Docker Compose](#), [Bash](#) and [Puppet](#)).
- Internal support tools.
- [AWS](#) ([Elastic Cloud Computing \(EC2\)](#), [Elastic Block Storage \(EBS\)](#)).
- Documentation of internal tools used at [AWS](#).
- Documents processes and procedures required.

- Job Scheduler ([Rundeck](#)).
- [Continuous Integration](#) ([Git](#), [Bitbucket](#), [Jenkins](#))
- Logs and metrics monitoring ([Datadog](#) and [Flapjack](#)).

[PoaTek IT Consulting](http://poatek.com) (<http://poatek.com>)

Technology company - Porto Alegre/RS

Oct/2016 - Jan/2018

Working on site for [AGCO \(Agriculture Corporation\)](#).

AGCO - IT Specialist

- Deployment and infrastructure automation ([Docker](#), [Docker Compose](#), [Bash](#) and [Puppet](#)).
- Continuous integration ([Git](#), [Bitbucket](#), [Bamboo](#)).
- Logs and metrics monitoring ([Elasticsearch](#), [Logstash](#), [Grafana](#) + [Telegraf](#) and [InfluxDB](#)).
- Environment automation development ([VirtualBox](#), [Vagrant](#), [Packer](#), [Linux](#), [Preseed](#)).
- Job Scheduler ([Rundeck](#)).
- Build tools ([Gradle](#) and [Apache Maven](#)).
- Linux server administration ([Ubuntu Server](#)).
- Documents processes and procedures required for developers.
- Learns new applications and functionalities as required.
- Participates in special projects, usually involving implementation of a new tool or application.

AGCO Projects

Puppet - Configuration Management This project was developed from scratch, since the creation of a functional environment in localhost to developers and operator could recreate the whole infrastructure managed using [Puppet](#), until it get to the environments, like development, staging and production.

Documentation of process, like:

- Mounting points
- Create new environments
- Code deployment by operators in production with puppet apply command, using [Continuous Delivery](#)
- Create new machines with specific modules
- Code deployment with [r10k](#)
- How to create new [Puppet](#) servers using [Puppet](#)

Developed codes:

- [Spring Boot module \(Java\)](#).
- Structural Scripts for nodes in format [YAML](#) written in [Ruby](#).
- [Shell Scripts](#) to install agents and configure it.

Tools like [Vagrant](#), [Shell Scripts](#) in [Ruby](#) were the great pillars for the project become viable.

All the developed code to automate environment was thinked in how to bring benefits for operators and development team.

Oracle automation using Docker for development

In this case, the demand was build a tool for developers creating scripts for Oracle, where those scripts had to pass for some pipelines until it get to production using Bamboo (Continuous integration tool).

Bamboo using Docker

Many of our projects used [Docker](#) for build the application developed by other companies. Our main problem was to create the same environment used in development to production like plugins and packages dependencies.

Shell Scripts environments

In some cases, we could not use some tools for configuration management, so I wrote scripts for environments to install and configure some tools, like: [Nginx](#), [CouchDB](#), [Spring Boot module \(Java\)](#) environment, [ActiveMQ](#).

Education

- 2017/1 – Information Technology Security
UNISINOS - São Leopoldo/RS. Not completed.
- 2010/1 – 2011/2 – Network Computers
Centro de Tecnologia em Automação e Informática, Florianópolis/SC, SENAI/SC. Not completed.
- 2008/1 – 2009/1 – Information Technology Security
UNISINOS - São Leopoldo/RS. Not completed.
- 2004/1 – 2007/1 – Network Computers Certificate
Escola Estadual de Educação Profissional em Estrela, Estrela/RS. Finished.

Languages

- Intermediate English for writing and speaking.
- Advanced English for listening and reading.

Courses

- 2018/2 - [Docker Crash Course for busy DevOps and Developers](#) - Udemy
- 2018/2 - [DevOps Foundation](#) - Estabilis - São Paulo/SP.
- 2018/2 - [AWS hands on](#) - Estabilis - São Paulo/SP.
- 2017/1 - [Puppet Fundamentals](#) - Instruct - São Paulo/SP (24 hours) - [Agenda](#).
- 2012/2 - Lean Software Development - WildTech - Porto Alegre/RS.
- 2011/2 - Accessing the WAN - Cisco Networking Academy - Florianópolis/SC
- 2011/1 - Lan Switching and Wireless - Cisco Networking Academy (recommendation letter) - Florianópolis/SC.
- 2010/2 - Routing Protocols and Concepts - Cisco Networking Academy (recommendation letter) - Florianópolis/SC.
- 2010/1 - Network Fundamentals - Cisco Networking Academy (recommendation letter) - Florianópolis/SC.

Lectures

- [2º TcheLinux Lajeado](#) - [Introdução ao Docker](#) - [Lajeado/RS](#).

Workshops

- [1º FOSSDay Lajeado](#) - [Docker Workshop - beginner and intermediate](#).
- [1º FOSSDay Bento Gonçalves](#) - [Docker Workshop - beginner and intermediate](#).

Vagrant Boxes

- [Debian 8.8.0 amd64 Docker CE](#)
- [Debian 8.6 amd64 Docker](#)

Docker Hub images

- [Docker Ansible](#)
- [Docker Terraform](#)
- [Docker Ansible](#)

Events/Conferences

- 2018/2 - [Kinghost Connection](#) - Online.
- 2018/2 - [1º FOSSDay Bento Gonçalves](#) - [Bento Gonçalves/RS](#).
- 2018/2 - [DevOpsDay](#) - [Agenda](#) - [Porto Alegre/RS](#).
- 2018/1 - [Google Onboard](#) - [Porto Alegre/RS](#) - [Agenda](#)
- 2018/1 - [1º FOSS Day Lajeado](#) - [Lajeado/RS](#).
- 2017/2 - [The Developers Conference - DevOps](#) - [Porto Alegre/RS](#).
- 2017/2 - [The Developers Conference - Containers](#) - [Porto Alegre/RS](#).
- 2017/2 - [DevOpsDay](#) - [Agenda](#) - [Porto Alegre/RS](#).
- 2017/1 - [2º TcheLinux Lajeado](#) - [Lajeado/RS](#).
- 2016/1 - [1º TcheLinux Lajeado](#) - [Lajeado/RS](#).
- 2010/2 - [5º Solisc - Congresso Catarinense de Software Livre](#) - [Florianópolis/SC](#).
- 2010/1 - [11º Fórum Internacional de Software Livre \(FISL\)](#) - [Porto Alegre/RS](#).
- 2009/1 - [10º Fórum Internacional de Software Livre \(FISL\)](#) - [Porto Alegre/RS](#).
- 2008/1 - [9º Fórum Internacional de Software Livre \(FISL\)](#) - [Porto Alegre/RS](#).
- 2007/1 - [8º Fórum Internacional de Software Livre \(FISL\)](#) - [Porto Alegre/RS](#).
- 2006/1 - [7º Fórum Internacional de Software Livre \(FISL\)](#) - [Porto Alegre/RS](#).

Meetups

- 2018/05/30 - [14º Docker Meetup](#) - SENAC - [Porto Alegre/RS](#)
- 2017/07/26 - [Microservices and Docker](#) - PUC - [Porto Alegre/RS](#)
- 2017/06/20 - [10º Docker Meetup](#) - PUC - [Porto Alegre/RS](#)
- 2017/02/09 - The news about Docker 1.13 - PUC - [Porto Alegre/RS](#)
- 2017/01/16 - 12º Continuous Delivery - PUC - [Porto Alegre/RS](#)
